## EXPERIENCE

**Uber** Seattle, WA
*Fullstack Software Engineer* *05/2022 – Present*

**Microsoft** Seattle, WA
*Fullstack Software Engineer* *06/2020 – 05/2022*

- Architected and deployed content share tray in Microsoft Teams for 145M+ daily / 278M+ monthly active users
- Designed and implemented end-to-end infrastructure for app collaboration on stage for meeting scenarios
- Enhanced Whiteboard in-meeting app reliability by 7% via cache mechanisms and Teams client SDK integration
- Managed Invision app integration for multi-platform, unified in-meeting share flow with React and TypeScript
- Established best practices for testing, logging, code style, and presented on various topics to help spread team knowledge and practices

**SelfMade** New York, NY
*Fullstack Software Engineer* *05/2019 – 01/2020*
*Freelance Software Engineer* *04/2020 – 10/2021*

- Developed browse page search feature utilizing pattern matching that served over 3K+ users
- Refactored existing front-end component for reusability that resulted in increased code shipment
- Engineered internal tools for cross-department usage that led to 10% increase in workflow efficiency
- Implemented features with frontend (React, Redux) and backend technologies (Express, Node, MongoDB)

**Various Teaching Positions** Multiple Locations
**Columbia University,** *Teaching Assistant* (New York, NY) *04/2019 – 10/2019*
**Fullstack Academy,** *Teaching Fellow* (New York, NY) *10/2018 – 02/2019*

- Led virtual instruction for 200+ university students by delivering engaging, industry-relevant lessons in Technical Interview Prep, resulting in mastery of core computer science concepts
- Coordinated with co-instructors and Teaching Assistants to facilitate interactive class activities and provide technical support, fostering a collaborative learning environment for first-generation and low-income students
- Taught and managed an accelerated immersive program covering system design topics including: caching, mastering the interview, scaling large distributed systems, client-server communication models, APIs, asynchronous and synchronous communication
- Taught 35+ students MERN stack (MongoDB/Express/React/Node) and provided help to understand technical concepts

## SKILLS

**Cloud & Infrastructure:** AWS (S3, Cloudfront, EC2) , Microservices
**AI/ML & GenAI**: LLMs (Claude, ChatGPT, Gemini), OpenAI, Claude Code, Cursor, Gemini, RAG Pipelines
**Languages & Frameworks:** JavaScript, TypeScript, Golang, Python, Java, React, Redux, GraphQL, Node.js, PostgreSQL, MongoDB, React Testing Library, Jest, CircleCI, Buildkite, Figma, Playwright

## EDUCATION

Georgia Institute of Technology | M.S., Computer Science (Artificial Intelligence & Machine Learning)
New York University | B.A., Economics (minors in Philosophy & Art History)
University of Minnesota | User Interface Design Specialization (via Coursera)

## CONFERENCE TALKS

| | |
|---|---|
| Integrating Agentic Workflows: Scaling Engineering Productivity for Uber's Onboarding Team (Conf42) | Sep 2026 |
| Render Your Go Code Clean: Introduction to Dependency Injection (Render ATL) | Jun 2024 |
| Component Testing with React Testing Library and Jest (Granite State Code Conference) | Nov 2022 |
| Context in React (Granite State Code Conference) | Nov 2021 |
